I am writing to apply for the Capoprogetto position for the revision of the Swiss Classification of Surgical Interventions (CHOP) at the Bundesamt fˆ…r Statistik (BFS). The opportunity to lead a structured revision of a national medical classification system, while contributing to the DigiSantˆ' digital transformation program, is directly aligned with my experience in managing complex, data-driven projects.

Through my professional experience as a Web Developer, I have planned and executed full-cycle software projects that required clear documentation, stakeholder coordination, and traceable workflows. I have managed communication with internal teams and external partners, ensuring that project milestones were met and that all decisions were properly recorded. This background in structured project delivery and cross-functional collaboration maps directly to the responsibilities of planning and implementing the CHOP revision.

One area that particularly interests me is working with classification systems and structured medical data. While my technical foundation is in software engineering and information systems, I have a strong interest in how data is organized, indexed, and maintained for accuracy and usability. I am comfortable working with terminologies, nomenclatures, and structured documentation, and I am eager to apply this interest to the medical classification domain.

In addition to my technical and project management experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and technical background can contribute to the successful revision of the CHOP classification.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
