I am writing to apply for the Associate Account Strategist position at Donut Studios, part of New Engen. Your focus on integrating media, creative, and analytics into performance-driven campaigns for ambitious brands is something I find genuinely compelling. I am eager to bring my organizational skills and client-focused approach to support your enterprise client engagements.

While my technical background is in software engineering, the core of my work has always been about coordination, communication, and delivery. In my role as a Web Developer at Explo-IT, I worked directly with stakeholders and engineering teams to scope requirements, track progress, and ensure projects moved from brief to delivery without friction. This experience taught me how to keep projects organized, maintain clear documentation, and proactively communicate blockers before they impact timelines.

One area where I can contribute immediately is in supporting creative delivery workflows. I have hands-on experience with tools like Figma for design collaboration, and I am comfortable working with project management platforms to track deliverables across multiple campaigns. My attention to detail and quality-first mindset means I review assets thoroughly to ensure they meet requirements before they reach the client.

In addition to my organizational skills, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can support Donut Studios and your enterprise clients. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
