I am writing to apply for the Project Manager role at Donut Studios, New Engen's in-house creative studio. The opportunity to help keep a key client engagement running smoothly while supporting creative teams and driving operational improvements aligns well with my experience.

Although my background is in software engineering, I have spent years managing complex technical projects from start to finish. In my role at Explo-IT, I coordinated feature delivery across backend and frontend teams, maintained project timelines, tracked tasks, and communicated progress to stakeholders. I am comfortable using project management tools like Asana, Slack, and Google Workspace to keep deliverables on schedule.

One area that particularly interests me is the emphasis on AI-powered workflows and automation. I have hands-on experience integrating AI tools into real projects, including building AI assistants and implementing automation pipelines. I am confident I can support Donut Studios in adopting smarter ways of working that improve team efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how I can contribute to Donut Studios.

WORTHWHILE RMTU5LjE5OC42Ni4xNjM=

Sincerely,
