I am writing to apply for the Digital Marketing Specialist position at Wish You Were Here Group. Your portfolio of celebrated restaurants and lifestyle destinations is impressive, and I appreciate the focus on combining creativity, technology, and data to build memorable guest experiences.

My professional experience is in full-stack web development and AI engineering, where I have built scalable digital platforms that prioritize user experience, performance, and conversion. I have worked extensively with technologies like Next.js, React, Laravel, and Tailwind CSS to create responsive, SEO-optimized websites and web applications.

One area that particularly interests me is the website and SEO responsibility outlined in the role. In my previous work, I have owned the full digital experience for multiple projects, focusing on UX optimization, conversion rate improvement, landing page creation, and technical SEO. I have also worked closely with designers and developers to improve the customer journey and ensure speed and performance.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
