I am writing to apply for the Facility Maintenance Technician position at PriceSmart. Although my professional background is in software engineering, I have developed strong problem-solving abilities, attention to detail, and a disciplined approach to maintenance and safety that I believe will serve me well in this role.

Through my work as a web developer, I have become accustomed to diagnosing issues systematically, following procedures precisely, and ensuring that systems remain operational under pressure. These skills translate directly into facility maintenance, where reliability, safety awareness, and the ability to prioritize multiple requests are essential.

I am comfortable working with tools and equipment, and I take accountability seriously. I am a quick learner who can adapt to new environments and follow safety and security regulations carefully. I am also experienced in coordinating with teams and communicating clearly to ensure tasks are completed on time.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills and work ethic can contribute to the PriceSmart team.
