I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I understand that modern tax firms increasingly rely on digital processes, secure systems, and efficient workflows. I believe my technical skills can bring value to a forward-thinking firm like yours.

Through my work as a Web Developer, I have built and maintained full-stack applications using Laravel, Next.js, and React. I have implemented authentication systems, role-based access control, secure payment gateways, and RESTful APIs. I am comfortable working with databases such as MySQL and PostgreSQL, and I have deployed applications on Linux servers using Docker and Nginx. These skills translate directly to supporting digital tax workflows and secure client data management.

One area that particularly interests me is building systems that are both secure and user-friendly. In my projects, I have focused on data integrity, real-time features, and clean, responsive interfaces. I am confident I could contribute to the digital infrastructure of a tax firm, helping to streamline processes and improve client-facing tools.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
