I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I bring strong analytical thinking, a methodical approach to complex work, and experience with digital systems that support efficient and accurate operations.

In my professional experience as a Web Developer, I have worked on building and maintaining scalable applications, optimizing database queries, and ensuring data integrity across systems. These responsibilities required careful attention to detail, structured workflows, and the ability to review and validate information thoroughly skills that align well with the preparation and review of financial statements and tax declarations.

One area that particularly interests me is the emphasis on digital workflows and modern tools within your partner firm. I have hands-on experience with Linux servers, Docker, and CI/CD pipelines, and I am comfortable working in technology-driven environments. I am also open to learning new domain-specific software and processes as needed.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my analytical mindset and structured approach could contribute to your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
