I am writing to express my interest in the Steuerberater position at Taxtalente.de. While my professional background is in software engineering, I am drawn to the opportunity to work in a digitally forward-thinking firm that values flexibility, modern processes, and individual strengths.

Through my work as a Full-Stack Engineer, I have developed strong skills in building secure, scalable systems using Laravel, Next.js, and MySQL. I am comfortable working with digital tools and automating workflows to improve efficiency and accuracy. My experience includes implementing authentication, role-based access control, and payment integrations, all of which require a careful and precise approach.

One area that particularly interests me is the emphasis on digital working methods and modern infrastructure. I have deployed and maintained applications on Linux servers using Docker, Nginx, and CI/CD pipelines, and I am confident in my ability to adapt quickly to new software environments and tax-specific tools.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills in digital systems and process optimization could contribute to your partner firm in Grafing.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
