I am writing to express my interest in the Steuerberater position at Taxtalente.de for a partner firm in Ratingen. While my professional background is in software engineering, I bring a strong analytical mindset, a structured approach to complex tasks, and a proven ability to work with digital systems and processes.

Through my work as a Web Developer, I have developed a methodical and detail-oriented approach to problem-solving. I have experience building and maintaining scalable systems, managing data integrity, and ensuring secure and reliable operations. These skills translate well into the careful, precise work required in tax advisory roles.

One area that particularly interests me is the emphasis on digital working methods and modern tools. I have hands-on experience with Linux servers, Docker, CI/CD pipelines, and cloud platforms, which means I am comfortable working in technology-driven environments and can adapt quickly to new digital tools and workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in digital systems and analytical work could contribute to your partner firm in Ratingen.

Sincerely,

Md Shahanur Islam Shagor
