I am writing to apply for the Associate Officer ARFF position at Adani Airport Holdings Ltd. Adani Group's work in building world-class infrastructure and transforming airport operations across India is impressive, and I am interested in contributing to the safety and security of your airport operations.

My professional background is in software engineering and autonomous systems, where I have developed strong skills in system monitoring, operational readiness, and incident documentation. I have worked with Linux servers, Docker containers, and monitoring tools like Prometheus and Grafana to maintain real-time visibility into system health and performance. This experience has taught me the importance of thorough inspections, accurate reporting, and maintaining equipment in a state of constant readiness.

In previous work, I collaborated with cross-functional teams including engineering, operations, and external stakeholders to ensure smooth incident response and system reliability. I am comfortable following standard operating procedures, identifying potential issues during routine checks, and taking corrective action promptly. I also have experience preparing detailed logs and reports for compliance purposes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
