I am writing to apply for the Psicopedagogos para alumnos con TDAH position at TUS Media. Your focus on providing personalized educational support through Tusclasesparticulares aligns with my commitment to helping individuals reach their potential through structured guidance and clear communication.

Although my professional background is in software engineering and AI systems, I bring strong analytical thinking, patience, and a methodical approach to understanding individual needs. These skills are directly applicable to conducting initial evaluations and collaborating with students and parents to establish meaningful learning goals.

In previous work, I have consistently communicated complex technical concepts to non-technical stakeholders, managed multiple priorities, and adapted quickly to new challenges. I am confident I can apply the same discipline and empathy to support students with ADHD in achieving their academic objectives.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
