I am writing to apply for the Residential Real Estate Title Search Quality Control position at Pippin Title. Your mission to modernize title search services through technology and a remote-first culture is something I find genuinely compelling.

My background is in software engineering, but the core of my work has always been about precision, analysis, and quality. Over the past four years, I have built and maintained complex web applications where accuracy and attention to detail were non-negotiable. Whether reviewing code, analyzing data flows, or verifying system outputs, I have developed a disciplined approach to quality control that I believe translates directly to title search review.

One area where I have consistently delivered is in examining documentation and extracting critical information. In my previous work, I regularly analyzed structured data, identified inconsistencies, and ensured final outputs met strict standards before delivery. I am comfortable working with detailed records, following specific procedures, and maintaining focus over long periods of detailed review.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical mindset, reliability, and commitment to quality to Pippin Title. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
