I am writing to apply for the Chief Executive Officer position at the Community HealthCare Association of the Dakotas. CHAD's mission to expand healthcare access in rural and underserved communities across the Dakotas is both meaningful and urgent, and I am drawn to the opportunity to lead an organization that directly improves community health outcomes.

My professional background has been in building and managing complex systems that require strategic oversight, cross-functional collaboration, and data-informed decisions. As a full-stack and AI engineer, I have led the development of platforms serving multiple user roles, coordinated with stakeholders across technical and business teams, and ensured that projects are delivered on time and within scope. These experiences have given me a practical understanding of organizational leadership, resource allocation, and the importance of clear communication across all levels.

One area that particularly interests me is CHAD's focus on workforce development and data-driven decision-making. In my previous work, I have built systems that track performance metrics, automate reporting, and provide actionable insights to leadership. I am comfortable working with data pipelines, monitoring tools, and analytics frameworks that support evidence-based strategy. I also have experience managing budgets, timelines, and vendor relationships for multi-module projects.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
