I am writing to apply for the Praktikant:in Fintech Operations position at Credibur. Your work on building infrastructure for credit portfolio management between alternative lenders and institutional investors is a practical application of fintech that I find genuinely interesting.

Through my web development experience, I have worked extensively with web-based dashboards, data processing, and payment systems. I am comfortable navigating complex interfaces, validating transactions, and ensuring data accuracy. These skills translate directly to the payment reconciliation and ticket management tasks described in this role.

In previous work, I built a full-stack multi-vendor e-commerce platform where I handled payment flows, order reconciliation, and role-based access control. This required careful attention to transaction matching, error handling, and clear documentation. I also developed a real-time server health monitoring dashboard that streams live metrics, which strengthened my ability to work with structured data and identify anomalies.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am enrolled at Voronezh State University of Forestry and Technology, studying Software Engineering, and I am based in Berlin. I am available for a quick start and would welcome the opportunity to contribute to Credibur’s operations team.

I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
