I am writing to apply for the Werkstudent (m/w/d) Marketing & Social Media position at PS Holding. Your focus on social media, branding, events, and content creation aligns well with my background in web development and digital content management.

Through my web development experience, I have built and maintained websites, created responsive user interfaces, and managed online content. I am comfortable with tools like HTML, CSS, JavaScript, and React, which support the technical side of content publishing and website maintenance. I also have hands-on experience with Canva, CapCut, and ChatGPT for creating graphics, editing videos, and generating content ideas.

One area that particularly interests me is the blend of technical and creative work in this role. I enjoy planning content, researching trends, and producing social media posts that engage audiences. My background in software engineering gives me a structured and analytical approach to content planning and campaign management.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my creativity, technical skills, and independent work style to PS Holding. I have attached my CV for your review and look forward to the possibility of contributing to your team.

Sincerely,

Md Shahanur Islam Shagor
