I am writing to apply for the Talent Acquisition Specialist / Recruiter (m/w/d) position at RealStudio GmbH. Your work in short-form content for major brands and the focus on finding people who truly fit the culture caught my attention. I am interested in contributing to a team that values quality hiring and team growth.

Although my professional background is in software engineering, I have spent years working closely with hiring managers and team leads to evaluate technical and cultural fit. At Explo-IT and DataSoft LTD, I participated in screening, interviewing, and assessing candidates for development roles. I learned to identify potential, communicate expectations clearly, and coordinate the full hiring pipeline from sourcing to onboarding.

One area I focused on was active sourcing through professional networks and direct outreach. I built talent pipelines by engaging with candidates on LinkedIn and other platforms, and I worked with team leads to define role requirements and evaluate alignment. I also created job descriptions and optimized recruitment workflows to reduce time-to-hire while maintaining quality.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can apply my structured, solution-oriented approach to help RealStudio find the right people and build a strong, cohesive team. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your recruiting efforts.

Sincerely,

Md Shahanur Islam Shagor
