I am applying for the Remote Market Research Assistant position at Francavilla Giuseppe. The opportunity to work on structured data collection and provide consumer insights for international brands aligns well with my analytical background and attention to detail.

Through my work as a software engineer, I have developed a strong ability to follow detailed procedures, conduct systematic research, and maintain data integrity. I have experience gathering and organizing information from digital sources, evaluating content objectively, and delivering findings within project deadlines. These skills translate directly to the responsibilities of this role.

One area that particularly interests me is the emphasis on objective evaluation of digital content and brand materials. In previous projects, I have worked with data collection pipelines, API integrations, and content management systems where accuracy and consistency were critical. I am comfortable working independently, managing my own schedule, and ensuring that every task is completed thoroughly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
