I am writing to apply for the Chief of Staff (m/w/d) position at RETAIL NXT. The role of building structure, driving cross-functional projects, and working directly with leadership to shape the next phase of a growing platform is exactly the kind of challenge I want to take on.

RETAIL NXT sits at the intersection of retail, technology, and digitalization, which is a space I find genuinely interesting. The opportunity to help professionalize a platform that connects decision-makers across these industries aligns well with how I like to work: focused on execution, clarity, and measurable progress.

In my professional experience as a Web Developer at Explo-IT, I was responsible for steering projects across backend development, frontend implementation, and stakeholder coordination. I regularly translated high-level objectives into concrete project plans with clear responsibilities and timelines. I coordinated between internal teams and external service providers, tracked progress across multiple workstreams, and identified risks or bottlenecks early. This required structured thinking, reliable follow-through, and the ability to communicate clearly with people working in different domains.

One area where I consistently added value was in building and optimizing workflows. Whether it was improving deployment processes, standardizing code review practices, or setting up transparent project tracking, I focused on creating systems that made teams more effective without adding unnecessary complexity. I am comfortable working autonomously, setting priorities, and taking ownership of outcomes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
