I am writing to apply for the Remote Praktikum Lektorat & Korrektorat im Verlag position at Litura GmbH. The opportunity to work with manuscripts and contribute to real book projects in a modern publishing environment is genuinely interesting to me.

Although my academic background is in Software Engineering, my work has always demanded strong attention to linguistic detail, clarity, and structure. In my research and project documentation, I regularly review complex technical content for readability, consistency, and precision. This has developed my ability to identify stylistic and orthographic issues and provide clear, actionable feedback.

One area that particularly interests me is the process of transforming a manuscript into a published book. I am familiar with the importance of structured workflows, version control, and collaborative review cycles. My experience managing multi-step technical projects has prepared me to handle editorial tasks methodically and reliably.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am available for a minimum of 3 months and can commit to a remote workflow with flexible hours. I have attached my CV for your review and would welcome the chance to discuss how I can contribute to your editorial team.

Sincerely,

Md Shahanur Islam Shagor
