I am writing to apply for the Associate Recruitment & Human Capital Consulting position at TJC Partners AG. What stands out to me is how deliberately you have built this company: bootstrapped, profitable from day one, and growing 500% in a year and a half without external capital. That kind of discipline and clarity is rare, and I want to be part of building the next phase in Munich.

Although my professional background is in software engineering, I have spent years working directly with clients, understanding their needs, and managing complex projects from start to finish. In my previous roles as a Web Developer, I was responsible for end-to-end delivery: gathering requirements, communicating with stakeholders, building solutions, and ensuring results. That experience taught me how to listen carefully, ask the right questions, and build trust over time.

The responsibilities outlined for this role require someone who can identify and qualify candidates, manage search mandates independently, and build lasting relationships with both candidates and clients. I am confident in my ability to do this because I have spent my career solving problems for people: understanding what they need, finding the right solution, and following through until the job is done. I am also comfortable working in a small team where everyone takes ownership and supports each other.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to learn the Legal, Tax, and Audit market from the ground up and contribute to TJC Partners' growth in Munich. I have attached my CV for your review and would welcome the opportunity to discuss how I can add value to your team.

Sincerely,

Md Shahanur Islam Shagor
