I am writing to apply for the Mitarbeiter (gn) fˆ…r die Abteilung EDV/Technik position at Volksbank Raiffeisenbank Fˆ…rstenfeldbruck eG. Your bank's focus on innovation and long-term employee development, combined with a collaborative team environment, is exactly the kind of setting where I can contribute effectively while continuing to grow professionally.

Through my professional experience as a Web Developer, I have built a solid foundation in IT support and system maintenance. I have worked extensively with Linux servers, Docker containers, Nginx, and Apache configurations, which has given me practical experience in maintaining and troubleshooting IT systems. I am comfortable supporting colleagues with computer issues, working with Microsoft 365 applications like Outlook and Teams, and handling day-to-day technical questions.

One area that particularly interests me is the opportunity to support IT projects and system optimizations. In my previous roles, I regularly coordinated with internal teams and external service providers to implement system improvements, manage technical migrations, and ensure smooth operations. I am used to working independently, taking structured approaches to problem-solving, and adapting quickly to new tools and workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to take on responsibility, learn your internal systems, and contribute to the IT team at Volksbank Raiffeisenbank Fˆ…rstenfeldbruck eG. I have attached my CV for your review and look forward to discussing how I can support your department.

Sincerely,

Md Shahanur Islam Shagor
