I am writing to apply for the founding Chief Executive Officer role at The Dollar Foundation, the non-profit steward of the Bitcoin Dollar DeFi yield platform. The vision of building a family of productive collateral primitives on a single, audited protocol is exactly the kind of technically ambitious, market-driven challenge I want to work on.

My work has consistently involved designing secure, decentralized systems. I developed a Privacy-Preserving Blockchain Framework for Autonomous Vehicles (OmniGuard V2X) that integrates blockchain, Zero-Knowledge Proofs, and Post-Quantum Cryptography to ensure data integrity and anonymity in Vehicle-to-Everything networks. This required deep thinking about trust, verification, and cryptographic security in distributed environments.

In addition to blockchain-adjacent work, I have built production-grade financial applications. I designed and developed an AI-powered financial app using Express, TypeScript, OpenAI, AWS, and MongoDB, handling authentication, data processing, and secure document generation. I also built Smart Finance, a full-stack personal finance platform with Next.js, Prisma, and Docker, featuring real-time updates, role-based access, and modular architecture. These projects demonstrate my ability to own complex systems end-to-end.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am comfortable operating in a small, senior team, building the playbook from scratch, and taking ownership of growth metrics. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to the Bitcoin Dollar and FISC token economy.

Sincerely,

Md Shahanur Islam Shagor
