I am writing to apply for the Quereinsteiger: Redaktion, Marketing, Vertrieb position at GITO mbH Verlag. The combination of editorial, marketing, and digital responsibilities in a publishing environment focused on Smart Factory and Industrie 4.0 topics aligns well with my technical background and interest in future-oriented industries.

Through my professional experience as a Web Developer, I have built and maintained websites, managed content workflows, and optimized digital platforms for performance and search visibility. I have worked with technologies such as Next.js, Laravel, and Tailwind CSS to create responsive, SEO-friendly interfaces, and I have deployed applications on Linux servers using Nginx and Docker. These skills directly support the website management, SEO/SEA optimization, and online shop support tasks described in the role.

One area that particularly interests me is the efficient creation and implementation of online and print advertisements. I have experience integrating third-party services and managing data-driven workflows, which provides a solid foundation for working with tools like Admagica.ai, Canva, or Adobe Firefly. I am comfortable learning new software independently and applying it to produce results quickly and accurately.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am a motivated learner who takes ownership of tasks and deadlines. I am confident I can contribute to the GITO team while growing into the role. My CV is attached for your review.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
