I am writing to apply for the Online Casino Game Tester position at RG&T Solutions. The opportunity to contribute to user experience testing on online casino platforms from a remote, flexible setup is something I find genuinely interesting.

Through my work as a web developer, I have developed a structured approach to testing and quality assurance. I am comfortable following detailed instructions, identifying issues, documenting bugs clearly, and meeting deadlines without compromising accuracy. I understand the importance of providing actionable feedback that helps improve platform usability.

I own a reliable computer and am prepared to complete the required online training. I am based in one of the eligible states and meet the age requirement. The flexible, work-from-home nature of this contract aligns well with my current availability.

In addition to my technical background, I communicate clearly and work well independently. I am fluent in Bengali and English, with working knowledge of Russian and Hindi, which supports collaboration in diverse environments.

I have attached my CV for your review. I look forward to the possibility of contributing to your testing team.
