I am writing to apply for the Member of Marketing Staff role at Slingshot. The mission behind Ash, making mental health support more accessible through thoughtful technology, is something I find genuinely important. I want to contribute to a team that builds trust with people on a deeply personal level.

My background is in full-stack development and product building. I have shipped multiple web applications from concept to deployment, working across frontend, backend, and infrastructure. This has given me a builder's mindset: I am comfortable creating content, running experiments, reading the data, and iterating fast without waiting for a large team or a predefined playbook.

What stands out to me about this role is the emphasis on hands-on execution. I have experience designing user-facing interfaces, integrating analytics to measure what works, and making decisions based on real metrics. I understand how to turn a product moment into something people want to share, and I am not afraid to kill what is not working.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the chance to help shape how Ash shows up in the world. My CV is attached for your review.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
