I am writing to express my interest in opportunities at Tamworth Regional Council. With a strong background in full-stack web development and a growing focus on AI and autonomous systems, I am eager to contribute to your team's technical initiatives.

Through four years of professional web development experience, I have built and deployed scalable applications using Laravel, Next.js, React, and Node.js. My work includes designing RESTful APIs, implementing role-based authentication, integrating payment gateways, and optimizing database performance with MySQL and PostgreSQL. I also have hands-on experience with Docker, Linux server management, and CI/CD pipelines.

One area that particularly interests me is building real-time, user-focused systems. I developed a real-time server health monitoring dashboard using React, Node.js, Socket.IO, and Docker, streaming live metrics to the browser with low latency. This project reflects my ability to deliver practical, production-ready tools that improve operational visibility.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can support Tamworth Regional Council's goals.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
