I am writing to apply for the f position at Ajax Systems. I understand that your hiring process includes AI-assisted evaluation, and I appreciate the transparency in your approach.

My background spans full-stack web development, AI integration, and system architecture. I have built production applications using Laravel, Next.js, React, and Node.js, and I have integrated AI services such as OpenAI and Replicate into real-world platforms. This combination of web engineering and AI experience allows me to build systems that are both functional and intelligent.

In previous work, I developed RESTful APIs, implemented authentication and role-based access control, and deployed applications on Linux servers using Docker and Nginx. I have also worked with real-time features using WebSockets and Socket.IO, and optimized database performance through query tuning and caching strategies.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills align with the needs of your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
