I am writing to apply for the General Operative position at ABP Food Group. While my professional background is in software engineering and systems development, I bring strong problem-solving skills, attention to detail, and a disciplined work ethic that I believe translate well into an operational environment.

Through my experience as a web developer, I have developed a methodical approach to tasks, whether debugging complex systems or ensuring that production deployments run smoothly. I am comfortable working with structured processes, following safety and quality standards, and adapting quickly to new workflows.

One area that particularly interests me is working in a team-oriented setting where reliability and consistency matter. I have collaborated across departments in previous roles, communicating clearly with both technical and non-technical colleagues to meet deadlines and maintain quality.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills and work ethic can contribute to the team at ABP Food Group.

Sincerely,

Md Shahanur Islam Shagor
