I am writing to apply for the Freelance RevOps Expert (Close) position at ProviPanda GmbH. Your platform's rapid growth and the challenge of optimizing 8,000+ inbound leads into a structured, high-conversion pipeline is exactly the kind of problem I enjoy solving.

Although my primary expertise is in full-stack engineering, I have built automation systems, data segmentation logic, and workflow engines that directly apply to RevOps. I understand how to analyze large datasets, define prioritization rules, and create automated sequences that reduce manual effort and improve team focus.

One area that particularly interests me is building lead-scoring logic. In previous work, I have designed systems that process high-volume data, apply conditional rules, and route information based on relevance. This experience translates directly to creating Smart Views, Tasks, and Reminders in Close that prioritize follow-ups by lead behavior and age rather than recency.

I also have experience with reporting and analytics. I have built dashboards that track pipeline momentum, identify stalled deals, and surface actionable insights. I can help your team understand where deals lose momentum and what adjustments to the workflow can improve close rates.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I am available to start immediately and can work independently with minimal onboarding. I look forward to the possibility of contributing to ProviPanda's growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
