I am writing to express my interest in the Steuerberater position at Taxtalente.de. While my professional background is in software engineering rather than tax advisory, I bring a strong orientation toward digital workflows, secure systems, and efficient process design.

Through my work as a Web Developer, I have built and maintained full-stack applications using Laravel, Next.js, and Node.js, with a focus on authentication, role-based access control, and real-time data handling. I am comfortable working with modern infrastructure tools including Docker, Nginx, and cloud platforms, and I approach each project with a careful, detail-oriented mindset.

One area that particularly interests me is the opportunity to work in a digitally enabled environment. I have experience designing systems that reduce manual overhead through automation and clear data flows. I believe this technical perspective can be valuable in a tax advisory setting where accuracy, efficiency, and secure handling of sensitive information are essential.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to discuss how my background in software engineering and digital process design could contribute to your partner firm in Ebelsbach. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
