I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I bring strong technical skills in digital workflows, secure systems, and process automation that can support a modern, digitally-driven tax practice.

Through my work as a Web Developer, I have built scalable full-stack applications using Laravel, Next.js, React, and MySQL. I have implemented role-based access control, real-time features, and secure payment integrations. I am comfortable working with databases, APIs, and deployment pipelines on Linux servers.

One area that particularly interests me is the emphasis on digital working methods and modern equipment. I have experience with Docker, Nginx, CI/CD pipelines, and cloud platforms like AWS and Google Cloud. I can help maintain and improve the digital infrastructure that supports efficient tax workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical skills can contribute to your partner firm in Sankt Georgen im Schwarzwald.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
