I am writing to apply for the Junior Digital Designer role at The Big Table Group. Your portfolio of over 200 restaurants across brands like Las Iguanas, Bella Italia, and Frankie & Benny's is impressive, and I am drawn to the opportunity to support digital creative across such a diverse set of brands.

Through my hands-on project development, I have built responsive, SEO-friendly web interfaces using Next.js, React, Tailwind CSS, and Bootstrap. I have experience with Figma for design work and am comfortable producing digital assets for websites, social media, and email. I also have working knowledge of AI design tools and web design tools, which aligns with your interest in emerging creative technologies.

In previous work, I supported website content creation and updates, adapted creative across multiple formats, and ensured consistency with brand guidelines. I am comfortable working collaboratively with marketing and digital teams, managing workload effectively, and contributing ideas in creative reviews. My attention to detail and pride in delivering high-quality work have been consistent throughout my projects.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the creative team at The Big Table Group.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
