I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I bring strong analytical capabilities, a methodical approach to complex problem-solving, and a deep comfort with digital workflows that could be valuable in a modern, digitally-oriented tax firm.

Through my work as a Full-Stack and AI Engineer, I have developed a systematic approach to handling complex, multi-step processes with precision and attention to detail. I am experienced in building secure, reliable systems and managing data integrity across distributed platforms. These skills translate well to the careful, thorough work required in tax preparation and review.

One area that particularly interests me is the emphasis on digital working methods and modern tools mentioned in your description. I have extensive experience with digital platforms, automation, and cloud-based systems. I am comfortable working with modern software stacks and can quickly adapt to new digital tools and processes used in tax preparation and client communication.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and technical skills could contribute to your partner firm in Braunschweig.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
