I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I understand the importance of precision, structured processes, and digital efficiency in professional services.

Through my work as a full-stack developer, I have developed a strong ability to analyze complex systems, identify patterns, and deliver accurate results under tight deadlines. I approach every task with thoroughness and a focus on quality, which I believe translates well into the careful review and preparation required in tax advisory work.

I am open to digital ways of working and comfortable with modern tools and platforms. My experience building and maintaining web applications has given me a practical understanding of how technology can streamline workflows, reduce manual effort, and improve accuracy in data-intensive environments.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
