I am writing to apply for the Buyer I position at Jabil. While my professional background is in software engineering, I bring strong analytical capabilities, data-driven decision-making, and a disciplined approach to process management that directly support the procurement and materials planning responsibilities of this role.

Through my work as a Web Developer, I have developed a methodical approach to analyzing data, identifying discrepancies, and resolving issues efficiently. I am comfortable working with complex datasets, maintaining data integrity, and using PC-based tools to monitor performance and generate reports. These skills translate naturally to the core duties of materials requirement planning, supplier performance tracking, and inventory management.

One area that particularly interests me is the emphasis on proactive problem-solving and cross-functional collaboration in this role. In my previous experience, I worked closely with diverse teams to ensure smooth project delivery, communicated clearly with stakeholders, and consistently met deadlines under pressure. I am confident in my ability to support Accounts Payable in resolving invoice discrepancies and to provide clear, actionable feedback on supplier performance.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my analytical skills and disciplined work ethic can contribute to Jabil’s procurement operations. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
