I am writing to apply for the National Manager A&D & Commercial Sales position at Caesarstone Ltd. While my professional background is in software engineering and AI, I bring strong project management, cross-functional collaboration, and client relationship skills that are directly relevant to this role.

In my experience as a Web Developer, I have led complex technical projects from concept to delivery, working closely with stakeholders to define requirements, manage timelines, and ensure alignment with business goals. I am comfortable coordinating across teams and communicating with both technical and non-technical audiences.

One area that particularly interests me is the opportunity to drive specification activity and commercial project development at Caesarstone. My experience managing multi-stakeholder projects and tracking progress through pipelines has prepared me to support the forecasting, pipeline management, and CRM proficiency required in this position.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and collaboration skills can contribute to Caesarstone’s growth.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
