I am writing to apply for the Watch Clerk position at the City of Campbell River. The role's focus on maintaining accurate records and supporting police services aligns with my background in building reliable, data-driven systems.

My technical experience includes working with databases such as MySQL, PostgreSQL, and MongoDB, where I have designed schemas, optimized queries, and ensured data integrity. I have also developed real-time monitoring dashboards and secure authentication systems, skills that translate directly to maintaining accurate logs and records in a clerical environment.

In my professional experience as a Web Developer, I built full-stack applications that required precise data management, user access control, and system reliability. I am comfortable working with structured data, following procedures, and ensuring information is accurate and accessible.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to the City of Campbell River.

Sincerely,

Md Shahanur Islam Shagor
