I am writing to apply for the AI & E-Commerce Automation Specialist role at Nature Heart GmbH & Co KG. Your focus on using AI and automation to optimize processes in the e-commerce health and nature products space is a direction I find genuinely interesting.

My work has consistently involved building systems that connect AI capabilities with practical web applications. Through hands-on project development, I have designed and developed AI-powered platforms that integrate OpenAI APIs, build intelligent assistants, and automate data processing workflows. For example, in an AI-powered real estate project, I trained multiple AI assistants using GPT models, integrated image processing APIs, and built role-based authentication with subscription plans and payment systems. This experience directly applies to developing AI-driven workflows and building AI agents for marketing, sales, and customer service.

A significant part of my technical work has focused on system integration and API development. I have built and integrated RESTful APIs for seamless data exchange between frontend and backend systems, set up authentication and role-based access control, and implemented secure payment gateways. I am comfortable working with webhooks, data flows, and third-party service integrations. My experience with Laravel, Node.js, and various databases gives me a solid foundation for connecting Shopify, HubSpot, and other business systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
