I am writing to apply for the Enterprise Account Executive, Advertising Technology Solutions position at Mirakl. Your work in marketplace innovation and retail media monetisation is impressive, and I am particularly interested in how Mirakl Ads helps businesses generate value from their ecommerce traffic.

My professional experience as a Full-Stack & AI Engineer has given me a strong technical foundation in building and scaling web applications. Over the past four years, I have developed marketplace platforms, ecommerce ecosystems, and AI-powered tools using Laravel, Next.js, Node.js, and React. This technical background allows me to understand the product deeply and communicate effectively with both technical and business stakeholders.

One area that particularly interests me is the full end-to-end sales cycle described in the role. In my previous work at Explo-IT, I was responsible for delivering complete web solutions, from requirement gathering and technical validation to deployment and client handover. I worked closely with cross-functional teams including product, engineering, and client stakeholders to ensure smooth project progression and successful delivery.

I am also comfortable with AI-powered tools and APIs, having integrated OpenAI and Replicate into production applications for features like intelligent assistants and image processing. This experience aligns well with Mirakl's preference for candidates who can leverage AI to improve sales workflows and deal preparation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical and sales-oriented background can contribute to Mirakl Ads' growth in the EMEA region.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
