I am writing to apply for the Leitung PPC (w/m/d) - Online Advertising position at IONOS SE. IONOS's role as a leading European digitalization partner for small and medium businesses is impressive, and the opportunity to drive AI-first PPC strategies across international markets is exactly the kind of challenge I am looking for.

My technical foundation is in full-stack development and AI engineering. I have built AI-powered applications that integrate predictive models, automate workflows, and process data in real time. Through hands-on project development, I have worked with OpenAI APIs, Replicate for image processing, and Python-based automation systems. This experience gives me a practical understanding of how AI can move beyond simple bidding into content creation, personalization, and attribution.

What stands out to me about this role is the emphasis on building an AI-native culture and eliminating manual tasks through automation. In previous work, I have developed systems that automate repetitive processes, from data extraction to PDF generation, and I have integrated real-time monitoring and alerting into production environments. I am comfortable working with data pipelines, API integrations, and cloud infrastructure on AWS and Google Cloud.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
