I am writing to apply for the Digital Art Director (w/m/d) position at IONOS SE. As a full-stack and AI engineer with strong experience in frontend development and UI/UX design, I am drawn to the opportunity to shape the digital experience of the IONOS shop from concept to execution. IONOS's position as a leading European digitalization partner for small and medium businesses is particularly interesting, and I appreciate the focus on data-driven, user-centered design.

My professional experience has given me a strong foundation in visual design and frontend implementation. I have worked extensively with Figma for designing interfaces and prototyping, and I have built responsive, conversion-focused UIs using Next.js, React, and Tailwind CSS. I have a strong sense of layout, typography, visual hierarchy, and digital aesthetics, and I am comfortable translating design concepts into performant, accessible code.

One area that particularly interests me is the end-to-end responsibility for product areas within the online shop. In my previous work, I have designed and developed landing pages, shop funnels, and other digital touchpoints, always balancing brand identity with usability and conversion goals. I have experience collaborating with cross-functional teams, including product managers, developers, and marketing, to ensure that design decisions are aligned with business objectives and technical constraints.

I also have experience integrating AI tools into the design and development process. Through my work on AI-powered applications, I have used tools like OpenAI and Replicate for content generation and image processing, which aligns with the role's interest in using AI in the design process. I am comfortable working independently and in teams, and I enjoy bringing new ideas to the table while maintaining a high standard of quality.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and look forward to the possibility of contributing to the IONOS team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
