I am writing to apply for the Multi Utility Locator position at Ledcor. While my background is in software engineering, I bring strong analytical skills, attention to detail, and a proven ability to work independently and manage complex tasks accurately.

Ledcor Technical Services designs, builds, and maintains wireline and wireless networks across North America. I find this work meaningful because reliable infrastructure depends on precise field operations and careful coordination between teams.

Through my professional experience as a web developer, I have developed a methodical approach to interpreting requirements, following detailed instructions, and delivering accurate results under deadlines. I am comfortable working independently, managing my own schedule, and maintaining high standards of quality and safety.

I am computer-savvy and experienced with multiple digital tools and applications. I am highly organized, self-motivated, and able to prioritize workload effectively. I communicate clearly with both technical and non-technical stakeholders and work well in team environments.

I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural settings. I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to the Ledcor team.

Sincerely,

Md Shahanur Islam Shagor
