I am writing to apply for the Werkstudent UX/UI Grafiker position at Activate Media GmbH. Your work with clients like Nestlˆ', BMW, and Deutsche Bahn, combined with your award-winning digital solutions, makes this an environment where I want to grow and contribute.

I bring practical experience with Figma for UI design, wireframing, and prototyping. Through hands-on project development, I have designed and built responsive interfaces using HTML, CSS, Tailwind CSS, and JavaScript. I understand that good UX is not decoration but function, and I approach design from the user's perspective.

In previous work, I have created screens and visual components for web applications, ensuring design consistency and usability. I have collaborated with development teams to translate design specifications into working interfaces, learning how to balance visual quality with technical feasibility.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am a student currently pursuing a Bachelor of Science in Software Engineering, and I am looking for a role where I can learn from experienced designers while contributing to real projects. I have attached my CV for your review and would welcome the opportunity to discuss how I can support your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
