I am writing to apply for the Marketing Manager position at batch2 engineering GmbH. Your work in battery and hydrogen safety is technically demanding and highly relevant to the energy transition, and I find the combination of deep engineering knowledge with practical, no-bureaucracy operations genuinely compelling.

My professional background is in full-stack web development, where I have spent over four years building and maintaining production web applications. I have hands-on experience with WordPress, HTML, CSS, JavaScript, Laravel, and modern frontend frameworks. This technical foundation allows me to manage websites effectively, update content, and ensure that digital properties remain accurate, fast, and professional.

One area that particularly interests me is the responsibility for maintaining and updating your company websites. In my previous roles, I have managed the full lifecycle of web projects from UI design and content layout to deployment and ongoing maintenance. I am comfortable working with content management systems, optimizing page performance, and ensuring that technical and marketing teams stay aligned on web-related tasks.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my web development and technical marketing support skills can contribute to batch2 engineering GmbH.

Sincerely,

Md Shahanur Islam Shagor
