I am writing to apply for the Pflichtpraktikum Webentwicklung position at frechekoepfe GmbH. Your focus on building modern websites and complex webapps with React, Next.js, Express.js, and Tailwind CSS aligns directly with the technologies I use daily. I am particularly drawn to your approach of combining real client projects with mentorship and internal training, which matches the kind of practical learning environment I am looking for.

Through hands-on project development, I have built full-stack web applications using React, Next.js, TypeScript, and Tailwind CSS. One relevant example is a Travel Agency App where I developed the entire frontend with Next.js, TypeScript, Material UI, and Tailwind CSS, integrated Google Maps, and built the backend API with NestJS, TypeScript, and MySQL. I also deployed the frontend on AWS Amplify and the backend on AWS EC2. This experience taught me how to build responsive, SEO-friendly interfaces and connect them to robust backend services.

In previous professional work as a Web Developer, I designed and developed scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, implemented authentication and role-based access control, and delivered real-time features using WebSockets. I also deployed and maintained applications on Linux servers with Nginx and Docker, and worked with Git for version control. These responsibilities directly match the tasks you described, including programming modern websites, maintaining projects, and supporting colleagues.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am available to start my Pflichtpraktikum flexibly and can commit to the required duration. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to frechekoepfe GmbH.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
