I am writing to apply for the (Junior) Consultant role at SpotOn Solutions. Your focus on construction, trades, and engineering, combined with a structured onboarding program for career changers, aligns with what I am looking for in my next step.

My background is in software engineering, where I have spent over four years building full-stack applications and working directly with clients. I am used to taking ownership of projects, communicating requirements clearly, and delivering results under pressure. These skills translate naturally into consulting, where understanding client needs and managing relationships is central.

What stands out to me about SpotOn is the emphasis on learning by doing. The combination of account management, recruiting, and 360-degree project management is exactly the kind of hands-on environment where I thrive. I am disciplined, comfortable with cold starts, and motivated by clear goals and performance-based rewards.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to bring my work ethic, adaptability, and hunger to learn to your team. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to SpotOn’s growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
