I am writing to apply for the Human Resources Generalist position at CoberonChronos. The opportunity to support a medical technology company that develops advanced nuclear medicine imaging systems is compelling, and I am drawn to the remote-first, globally distributed nature of the team.

My professional background is in software engineering, where I have worked extensively with cross-functional teams across different countries and time zones. Through my work as a Web Developer at Explo-IT and DataSoft LTD, I have developed strong organizational skills, clear written and verbal communication, and the ability to manage multiple priorities simultaneously. I am accustomed to coordinating with stakeholders, documenting processes thoroughly, and ensuring that information flows clearly between technical and non-technical team members.

One area that particularly interests me is the emphasis on candidate experience and full-cycle recruitment. In my previous roles, I have been responsible for interviewing and onboarding new team members, helping to create a welcoming and structured experience for newcomers. I understand the importance of clear communication, timely follow-ups, and maintaining a professional yet approachable tone throughout the hiring process.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
