I am writing to apply for the Administrative Assistant role supporting Pickle's client, a growing joinery business. The opportunity to provide hands-on, customer-facing admin support and take genuine ownership of day-to-day operations aligns with my approach to work.

What stands out to me about Pickle is the emphasis on human judgement, autonomy, and doing things properly. I value clarity over chaos and ownership over excuses, which matches the culture you describe. I am looking for a role where I can contribute directly and see the impact of my work.

In my previous professional experience as a Web Developer, I managed multiple client projects simultaneously, communicated directly with stakeholders, and ensured deadlines were met without supervision. This required strong organizational skills, attention to detail, and the ability to prioritize effectively. I am comfortable handling varied workloads and taking responsibility for delivering accurate results.

I am confident in my ability to manage emails and inbound calls, prepare quotes and invoices accurately, and keep scheduling on track. I am UK-based, fluent in English, and used to working independently in remote settings. I do not need to be chased to follow through on commitments.

In addition to my professional experience, I work effectively across teams and communicate clearly with both technical and non-technical people. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international environments. I have attached my CV for your review and would welcome the chance to discuss how I can support your client's growing business.

Sincerely,

Md Shahanur Islam Shagor
