I am writing to apply for the Founder Ghostwriter role at Paired, working with the fastest-growing Google Ads agency in the world. The opportunity to script a founder's voice across LinkedIn, Twitter, and Instagram, and help shape a personal brand that is already influential, is exactly the kind of work I want to do.

I am a full-stack engineer and writer who uses Claude as a daily tool to produce content at volume without losing the human feel. I know the difference between using AI to scale and using AI to produce slop. My approach is to research what is moving in the space, find the angle before the feed catches up, and write in a voice that sounds like the person behind it, not a content calendar.

One area that particularly interests me is direct response writing. I understand what makes a person stop and read, and I can adapt that instinct across platforms. Whether it is a LinkedIn post on Google Ads strategy, a Twitter thread on ecommerce operations, or an Instagram video script, I can shape the message to fit both the platform and the founder's documented voice.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to learn the DTC and Google Ads world deeply, work alongside a senior team, and help steer a personal brand that is already moving fast. I have attached my CV for your review and look forward to the possibility of contributing to this work.

Sincerely,

Md Shahanur Islam Shagor
