I am writing to apply for the Assistente de Processos position at Sicoob. The opportunity to support process management and continuous improvement within a cooperative financial institution focused on financial justice and prosperity is genuinely interesting to me.

Through my professional experience as a software engineer, I have developed a structured approach to analyzing workflows, documenting procedures, and implementing improvements. I have supported the mapping and updating of operational flows, contributed to standardization efforts, and helped maintain clear documentation for internal processes. These experiences have given me practical insight into how well-defined processes contribute to organizational efficiency.

A relevant example is my work on the Multivendor E-commerce Management Ecosystem, where I coordinated multiple stakeholder workflows across customer, seller, and logistics modules. This required careful documentation of business rules, monitoring of operational indicators, and continuous refinement of procedures to ensure smooth coordination between different teams and systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in process support and continuous improvement can contribute to the Solutions and Business Process Support team at Sicoob.

Sincerely,

Md Shahanur Islam Shagor
